With a Province of Quebec Revi-Sols II contribution grant, administered by the City of Shawinigan, ICI commenced an estimated \$8.1 million accelerated remediation of its 7.9 hectare former chemical plant site in Shawinigan in 2001 in order to facilitate its commercial redevelopment. The project entailed the excavation of contaminated soil, that exceeded criteria acceptable commercial land use criteria; its treatment and disposal, and the ongoing treatment of contaminated ground water. Resulting redevelopment projects to-date exceed \$20 million in investment and the creation of 250 new jobs.
